

# Our businesses

Our activity is divided into two complementary areas: EPC projects and specialised industrial services.

## EPC PROJECTS

### MINING & HANDLING

- Mineral processing plants.
- Port terminals.
- Dispatch systems for truck and train.
- Storage and homogenisation parks.
- Biomass and alternative fuel transport.

### ENERGY

- Gas turbine power plants.
- Conventional thermal power stations.
- Cogeneration plants.
- Biomass.
- Waste to energy.

### INDUSTRY

- Turnkey industrial plants (fertilisers, chemical plants, etc.).
- Projects related to the energy transition.
- Green hydrogen, ammonia, methanol plants and CO2 capture systems.

### ENERGY STORAGE

- Fuel and LNG storage terminals.
- Conventional tanks.
- Single or double-walled refrigerated or cryogenic tanks.
- Pressurised spheres and bullets for fuel storage.
- Tanks for molten salt storage.
- Special tanks (digesters and sludge tanks).
- Flat-bottom tanks and double-walled spheres for LIN, LOX, LH2.

## SERVICES

### MOMPRESA

- Assembly and overhauling of turbo generators and auxiliary equipment in all types of power plants (nuclear, conventional, combined cycle, hydroelectric, etc.)

### DFOM

- Electromechanical assemblies, thermal, cryogenic and acoustic insulation, commissioning and operation of power plants and industrial facilities.
- Scheduled shutdowns and industrial services in general.
